Power shouldn't be your biggest expense.

Red Earth Electrical can provide an all encompassing energy solution. We can provide the best electrical and solar installations to cater to your power requirements and needs.

We are able to design, plan, supply and install the best solar equipment to meet the needs of your budget, location and environment.

Solar

At Red Earth Electrical we understand that the main motivator of most clients exploring solar is to benefit from it financially. We also know that solar energy and equipment are not a one size fits all product. We strive to provide the best designs and installation of solar to your property.

We are able to design, plan, supply and install the best solar equipment to meet the needs of your budget, location and environment.

Energy storage

Solar Battery Storage solutions are here. The technology is available to maximise the use of energy generated from your new or existing solar system. We have the qualifications and experience to design, plan, supply and install the latest Solar Battery equipment to meet the needs of your budget, location and environment.

The latest Solar Battery systems also have backup power capabilities which we can design and install to meet your individual needs.

Monitoring

Solar and power monitoring are an integral part of all solar systems. We have products to suit ANY existing or new solar installation.

We can supply and install software to regularly check your solar system and power usage. This will provide you with the information required to best utilise your solar system, expand your solar system or install a solar battery. All systems operate on both PC's and app devices, meaning you can check it anywhere in the world.

We're in your neighbourhood.

We know the countryside. And we know it's tough to gain service in the bush. From our base in Dubbo, we cover the Central West, Far West and North West of NSW. Call us from anywhere from the mountains to the borders to the coast.

Talk to us about an all-encompassing energy solution. Red Earth Electrical can provide the most effective electrical and solar design solutions for your individual needs.

Electrical Design

Talk to us about all encompassing energy solutions for new buildings or specific solar solutions for your individual needs. You can trust us to come up with creative solutions for any rural, commercial or residential challenge.

Maintenance

Red Earth Electrical provides all general electrical and solar maintenance services to the Dubbo Community. We know the financial burden that electrical and solar breakdowns can cause

families and business'. That's why Red Earth Electrical has an experienced maintenance team to provide you with the best solutions and repairs for all your electrical and solar systems. We also provide our professional electrical and solar services to insurance providers and contractors.

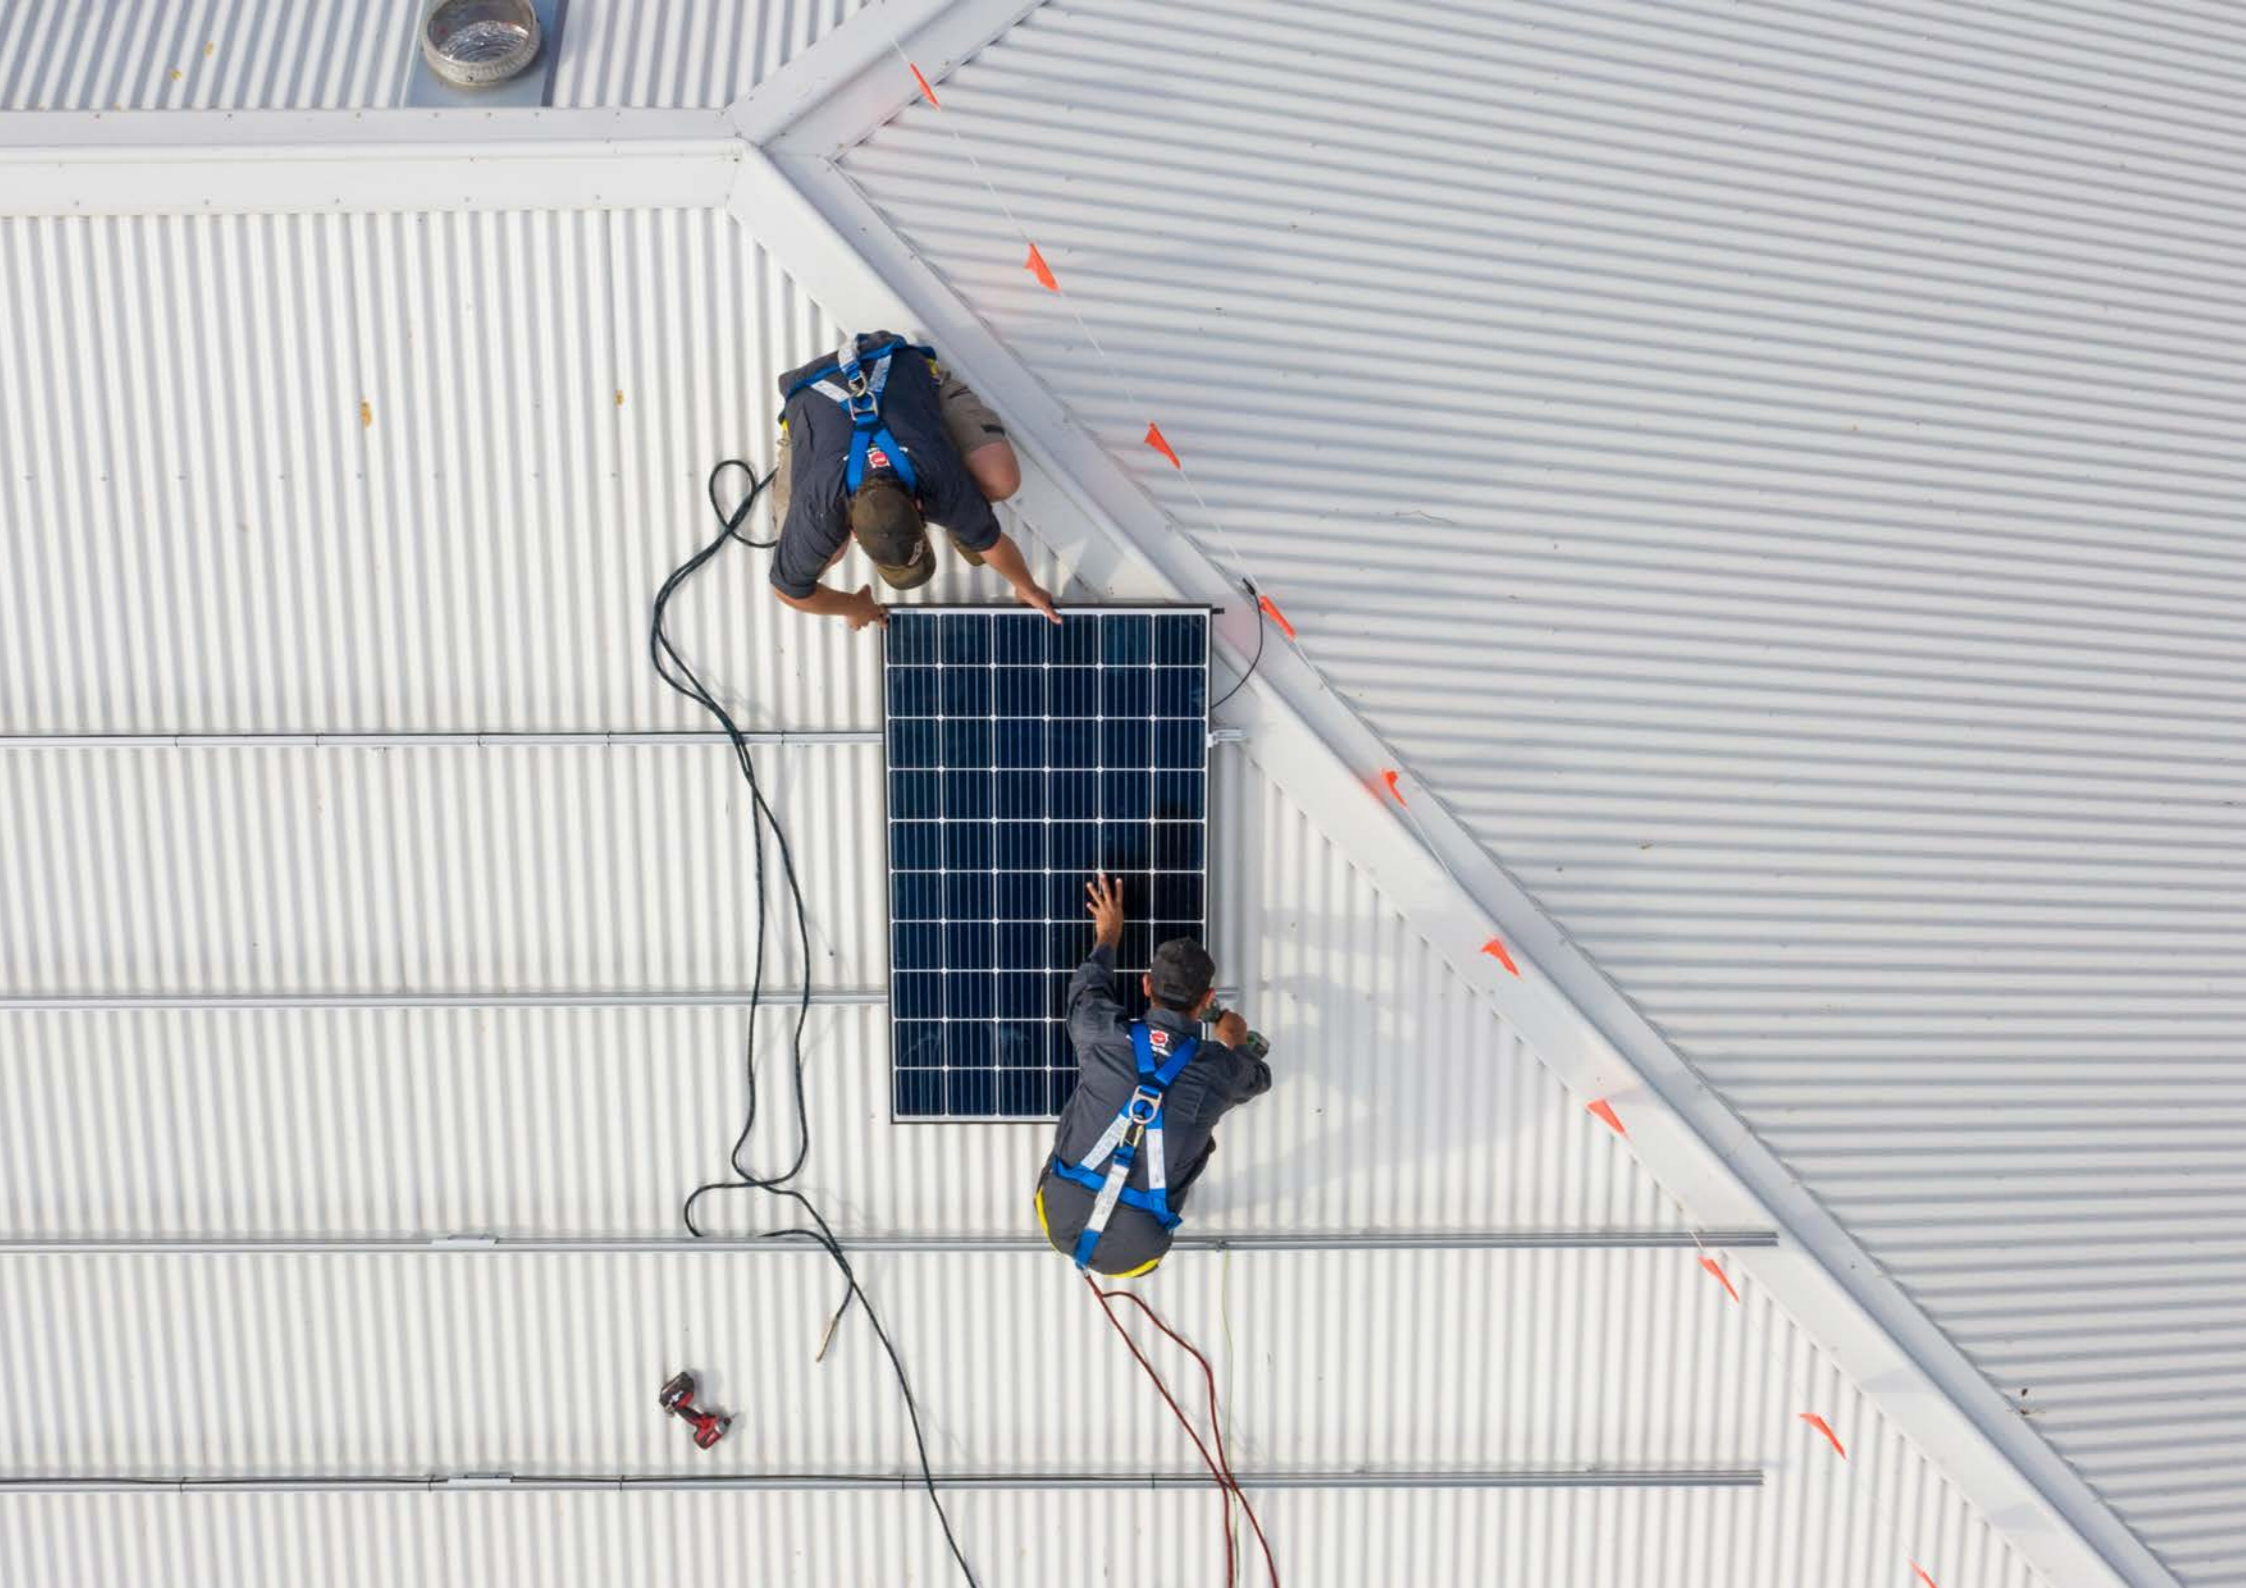

Level 2 work

Your one stop shop for energy.

Red Earth Electrical are accredited Level 2 Authorised Service Providers in the Essential Energy Network.

We can arrange connection approvals, connect new customers to the network and install and upgrade metering equipment.

Red Earth Electrical can provide a complete energy solution for your needs. The whole process can be done with us. From design and approval to construction and installation.

We have a complete solution for all your energy needs.

Red Earth Electrical believe that the best investment is the best design. We can assist in the energy and solar design for new and existing sites. We help our clients save money with a personalised solar solution.
